

## ABSTRACT

A wearing article 4(A to D) includes a main body 5(A to D) having a front part P, a back part Q and a crotch part R coupling the front part P and the back part Q. The main body 5(A to D) includes a pair of waist edges T opposed to each other and a pair of leg edges S opposed to each other. A shirring 15 is so formed in a substantially widthwise middle portion of the crotch part R of the main body 5(A to D) as to shorten a space between the front part P and the back part Q. A ratio of the length L1 of the crotch part R along the forward and backward direction X to a length L2 between the pair of waist edges T is 1:15 to 1:2.
